EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert E. Bushnell on January 4th, 2008.

Claim 20 of the instant application has been amended as follows:

Claim 20: In an apparatus for operating and maintaining a private mobile communication service system using an internet protocol (IP) network, the private mobile communication service network having a private base station controller (pBSC), a wireless system manager (WSM), and a base station transceiver subsystem (BTS); a base station [[main]] controller main processor (BMP) comprising:

a local area network (LAN) interface for providing an interface with a LAN to allow an IP communication;

an operation/maintenance information transmission unit responsive to reception of operation/maintenance information for ascertaining a link address, and for transmitting the operation/maintenance information through the LAN interface when the link address is a certain address; and

an operation/maintenance control signal transmission unit for receiving an operation/maintenance control signal through the LAN interface, and for transmitting the operation/maintenance control signal to a hardware alarm collection unit;

Application/Control Number:

10/773,235 Art Unit: 2616

wherein the WSM comprises a maintenance function module for receiving the operation/maintenance information from the BMP, for providing a maintenance function including at least one of system status monitoring, system failure control and system tests, and for creating and outputting the operation/maintenance control signal; and wherein the maintenance function module comprises:

a status manager for monitoring the status of processor of the system, various links and various devices;

a fault manager for collecting failures and alarms of the system, and for reporting them to an operator; and

a test manager for testing devices and processing test calls.

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung Q. Tran whose telephone number is (571) 272-9737. The examiner can normally be reached on Mon-Fri: 7:30 am - 5 pm, off alternative Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kwang B. Yao can be reached on (571) 272-3182. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
